Solutions for Secure Access Control with
Integrated Payment Terminal

EasyGate SPA | BAR SPA | Door SPA | Door SPA mini

Pay2Go Solution

Securing your Premises and Offering High Return on Investment

Pay2Go Solution offers a convenient way to make your premises secure and profitable.

It is designed to provide **reliable access control**, which naturally **decreases vandalism and mistreatment of facilities whilst avoiding unauthorized and unpaid access.**

BlueWall paid access solutions stand out by providing a **high level of convenience and user-friendliness** for visitors, and at the same time, allowing self-service and thus **reducing operating costs** for the facility operator.

It is an **ideal solution for managing access to toilets, public conveniences** and other areas in places with a medium to a high frequency of visitors, such as **petrol stations, leisure centers, watchtowers, restaurant chains, shopping centers, and public transport stations.**

Our offer recognizes the specifics of each application area and various requirements in the level of the desired security and other product capabilities. Therefore, you can **choose from four options - EasyGate SPA*, BAR SPA, Door SPA, and Door SPA mini.**

High ROI

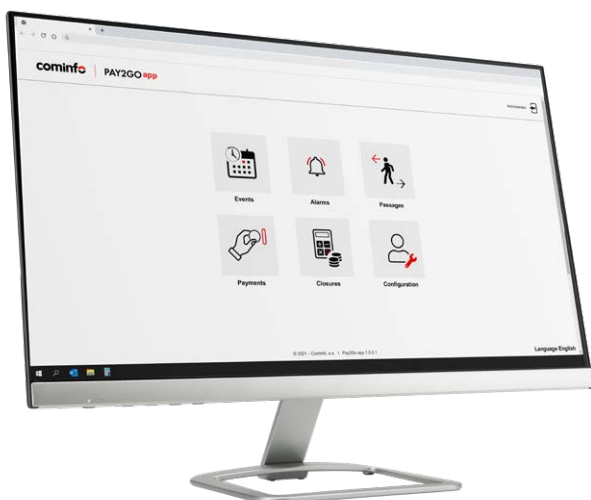

Absolute security

User-friendliness

Scalable solution

Pay2Go Application

Accurate **recording of customer flow, entrance fee setting and reporting**, and even **monitoring** is provided by an innovative BlueWall Pay2Go Application. It is **accessible from any device within the facility network via a web browser**. All the reports, such as alarm conditions, notifications, visitor payments, and general events, are exportable to Excel, CSV, and a variety of other formats. Application is **available for the whole range of Pay2Go products.**

- See all your transactions
- Easily manage your product
- Take advantage of comprehensive reports and analyses
- Be immediately notified in case of security incidents

* SPA = Secured Paid Access

Scalable and Versatile

BlueWall always strives to offer perfect solutions to **meet growing security requirements** and expectations for a **seamless entrance**. This philosophy is met with an idea to develop products that would ensure their usability in various premises to **lower overall the operating costs** of the customer.

Paid access solution comprises **four models** allowing to **select the most efficient product according to the specific needs** and goals of the customer. The product portfolio is categorized by its level of security, throughput, visitor comfort, payment options, and optional accessories.

The most sophisticated solution, **EasyGate SPA**, provides not only a **maximum level of protection and convenience**, but also speed and precision. **BAR SPA**, an automated waist-height arm turnstile with a built-in payment terminal, provides an **optimal price-performance ratio**. The economic solution is offered through a combination of **Door SPA** payment terminal **and EasyScan W** barcode scanner, which is suitable for **premises with limited space and a medium frequency of visitors**. The **Door SPA mini** is the ideal choice **wherever space is at a premium**.

Regardless of which paid access solution is chosen, reliability, long product life-span and durability ensure a **high return of an initial investment and a regular stable income**.

EasyGate SPA

Premium and Innovative Paid Access Solution

BlueWall's **cutting-edge, premium paid access solution** is perfectly geared towards premises with a high velocity of customers. It is **built on advanced speed-gate technology** coupled with an **intuitive payment system**, which creates a product that accelerates and facilitates purchasing process and offers **superior security**.

EasyGate SPA offers a **smooth and user-friendly interface** and compatibility with several payment methods in light of ever-increasing demands for uncomplicated and convenient access control.

Whilst enhancing the visitor experience, our premium solution also provides the highest levels of security. **High-precision optical sensors** combined with quick-reaction glass barriers ensure that **unauthorized persons cannot access secured area**. Besides **mitigating attempts to climb over**, EasyGate SPA also **eliminates possible tailgating threats**. Well-thought out construction of turnstile **motor guarantees reliability and long service life** (25 million MCBF*).

Coin validator with cashback function comes as a standard. And to make the purchase as easy as it gets, EasyGate SPA can be equipped with a **contactless payment terminal**, **QR scanner** for voucher redemption, or a **token validator**.

* Average number of cycles between failures

Combining modern construction materials like glass and metal creates an airy yet highly functional product design.

EasyGate SPA can be optionally equipped with a **build-in thermal printer** for receipt, alternatively voucher printing. Furthermore, facility staff have an option to utilize BlueWall **TMON control and monitoring software** for an effective and efficient way to manage installed turnstile.

BENEFITS

- Multiple ticketing and payment options
- High-sensitivity sensor technology with glass wing barriers ensures maximum security and safety
- Wheelchair access as a standard in EasyGate SPA Premium model
- User-friendly product design and smooth, understandable navigation
- Solid construction of patented motor guarantee 25 million MCBF (Mean Cycles Between Failure)
- Advanced terminal management with innovative Pay2Go Application
- RFID reader for a employee access and financial reports preview on a turnstile display as a standard

BAR SPA

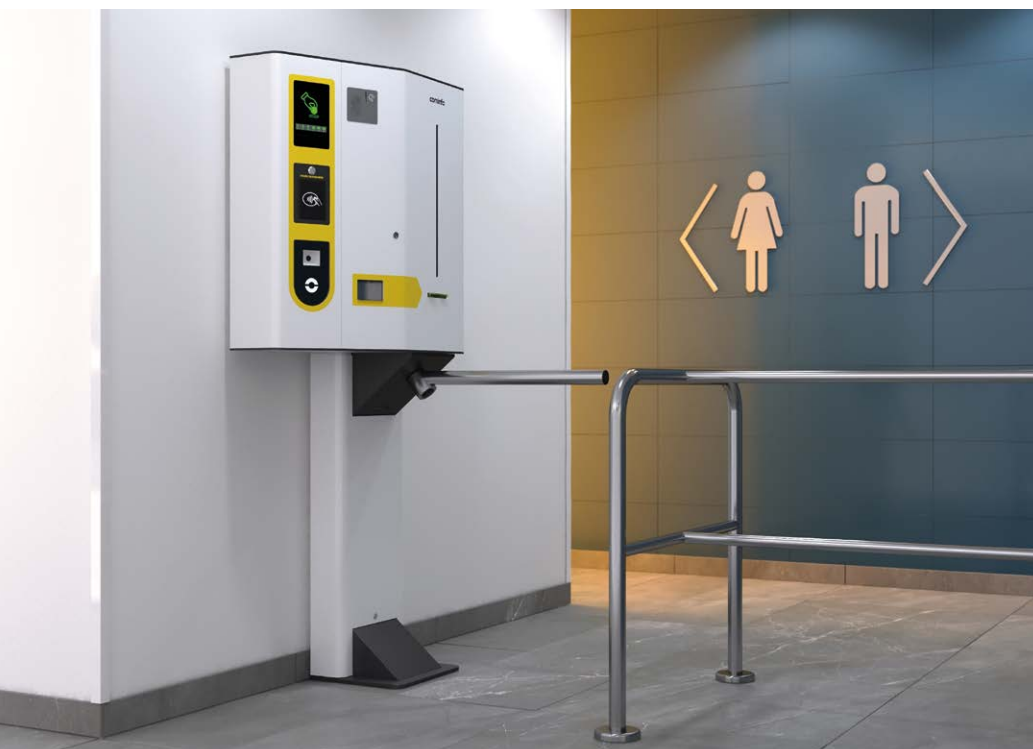

Durable Paid Access Solution For a Heavy Visitor Traffic

BAR SPA is a **fully automated waist-height turnstile** with a **built-in payment terminal**. Durable cabinet construction and **efficient motor with a long service life** (25 million MCBF*) make it a **reliable and secure solution** for a high-traffic environment.

Quick-reaction arm system allows **only one person at a time to pass through the turnstile**. This relieves the strain on security and **mitigates any unauthorized entrance** which might result in vandalism and mistreatment of your facilities.

As an option, high-precision sensors can be integrated within the cabinet to **detect any attempts to crawl-over and crawl-under** turnstile arms.

The user-friendly terminal design and intuitive display interface make the **purchasing process fast and convenient**. Moreover, using **contactless payments** is becoming firmly entrenched amongst the public as it is seen as safe and swift compared to traditional payment methods. Therefore, it is offered as an option to standard **coin validator**. Alternatively, a **QR code scanner for voucher** redemption and a token validator is also available.

* Average number of cycles between failures

The modular design of the cabinet allows the integration of additional technologies for visitor, employee, and operator comfort.

BAR SPA can be optionally equipped with a **build-in thermal printer** for receipt, alternatively voucher printing. Furthermore, facility staff have an option to utilize BlueWall **TMON control and monitoring software** for an effective and efficient way to manage installed turnstile. Lastly, an LCD screen for local advertising can be integrated on the exit side of the cabinet.

BAR SPA is available in unipod or tripod versions and right-hand or left-hand designs to fit your installation site.

BENEFITS

- Multiple ticketing and payment options
- Solid construction of patented motor guarantee 25 million MCBF (Mean Cycles Between Failure)
- Highly secure and durable solution
- User-friendly product design and smooth, understandable navigation
- Advanced terminal management with innovative Pay2Go Application
- RFID reader for employee access and financial reports preview on a turnstile display as a standard

Door SPA

Economic Paid Access Solution Suitable for a Limited Space

SPA terminal complemented with EasyScan W reader is a compact and space-saving paid access solution that **guarantees a good level of security for premises with a modest number of visitors.** An emphasis on offering a product that overcomes limits of available space is strengthened through the availability of a **wall-mounted** and particularly **flush-mounted version** of Door SPA.

The automatic self-service purchasing process **reduces possible staff workload** and waiting times for faster facilities usage, provides instant and accurate reporting and **raises additional revenue.**

High-contrast colored display provides an **intuitive user guidance** through a minimalist, well-thought interface, making the purchase process self-explanatory.

Public transport

Petrol stations

Restaurant chains

Amusement parks and leisure centres

Multiple payment methods are available for visitor comfort.

As standard, Door SPA is offered with an integrated **coin validator** with the possibility of coin return.

Optionally, Door SPA can be equipped with a **contactless payment terminal**, **token validator**, or a **QR code scanner** for ticket redemption.

Door SPA is available in wall-mounted and flush-mounted versions.

BENEFITS

- Large selection of payment methods
- Barrier-free solution allowing efficient use of available space
- An economical solution with a high return on initial investment
- User-friendly product design
- Advanced management with the innovative Pay2Go application
- RFID reader for employee access and for viewing financial statements on the turnstile display

- 1** Visitors to the facility are guided through the purchase on the **Door SPA** display. The payment station is simple and easy to use. The whole process is user-friendly.
- 2** After a successful purchase, the ticket with the QR or barcode is printed using the built-in POS printer and is ready to be scanned by the **EasyScan W** scanner.
- 3** The reader is installed on the wall next to the door leading to the paid area. Access is permitted on the basis of a valid ticket with an anti-passback function to prevent reuse.

EasyScan W

EasyScan W offers a **convenient solution for visitor access verification using a QR ticket or barcode**. Thanks to its high recognition capability, it can **easily read supported barcode types** from the smartphone display, even from a wide angle.

In addition, **EasyScan W / RFID supports RFID technology**, which can usually be used to allow employees to enter a secure area with an access card, eliminating the need to print one-time tickets.

Thanks to its versatility and scalability, the reader is **suitable for both individual access points and as part of a robust system**.

EasyScan W can be seamlessly connected to the Door SPA payment terminal. The combination of these products provides an effective solution for access management in areas with limited space and lower visitor frequency.

The modern design, with its elegant glossy finish and compact housing, **blends harmoniously with any interior**.

Door SPA mini

Compact paid access solution

Door SPA mini is the ideal space-saving paid access solution that guarantees a sufficient **level of security** for your premises.

The terminal **controls the electromagnetic lock of the nearby door**. After paying for entry (**cash or payment card**), the lock is unlocked and the visitor is allowed to enter the door next to which the device is installed. Unlocking the lock is also possible with a **contactless card for employees** or a Eurolock (if the payment terminal is equipped with one).

The display shows the payment instructions and information about the transaction's progress. It also allows employees to view financial statements.

BENEFITS

- Intuitive information display
- Barrier-free solution allowing efficient use of available space
- An economical solution with a high return on initial investment
- User-friendly product design
- RFID reader for employee access
- Possibility to equip with Eurolock

The Door SPA mini is available in both wall-mounted (Door SPA mini) and flush-mounted (Door SPA mini W) versions.

Financial analysis

General example of use for paid access

	Number of inputs	Fee of 0.5 EUR / person
Daily	600	300 EUR
Monthly	18 000	9 000 EUR
Annually	219 000	109 500 EUR

Example of use for the access to the toilet at a busy petrol station using a coupon system

	Number of inputs	50 % of customers will not use the coupon. Fee of 0.5 EUR / person	50 % of customers will use the coupon. Average purchase of 2 EUR	Total sales with Pay2Go products
Daily	600	150 EUR	450 EUR	600 EUR
Monthly	18 000	4 500 EUR	13 500 EUR	18 000 EUR
Annually	219 000	54 750 EUR	164 250 EUR	219 000 EUR

Use of EasyGate SPA in public toilets in a shopping centre

Turnstiles featuring a payment terminal in public toilets in shopping centres can help collect money to **cover the cost of water, cleaning or the wear and tear of sanitary facilities**. Our client – the operator of a shopping centre in one of the regional towns of the Czech Republic – also found out that his **investment in the EasyGate SPA turnstile paid back in less than four months**.

return on investment

passes per month

revenue per month

Premium quality turnstiles

The shopping centre has dozens of shops, several restaurants, a pharmacy, and a bank. **It is visited by thousands of people every day.**

For access to paid toilets, the operator has chosen the EasyGate SPA turnstile, which is ideal for public premises thanks to its **drive mechanism featuring a service life of over 25 million cycles**. Two swing wings with 10 mm tempered glass, glass infill panels, and brushed stainless steel

cabinets provide an unobtrusive design with a **high level of security**, as well as **barrier-free access**.

The turnstile is equipped with 27 pairs of optical sensors that **reliably detect any attempted unauthorized access**. This **eliminates, for example, tailgating** when someone tries to pass through the turnstile just behind the paying person. This means that a group of people won't be able to pass if they only pay once.

Both cash and card payments

To ensure visitor comfort, EasyGate SPA offers **two payment methods**. Visitors can choose between a classic coin-validator and a contactless terminal for payments by card, mobile phone, or smartwatch. **LCD guides the visitor** and informs them about the payment options and successful payments. **The visitor is well informed and always knows what to do.**

The turnstile is **equipped with an RFID reader for employees** to allow cleaning or service staff to pass through and also allows financial statements to be viewed directly on display.

The investment returned in just 4 months*

Although the operator of the shopping centre set a relatively low price of 0.2 EUR per entry, with the number of visitors to the toilets at 19 450 people per month, **the investment in the EasyGate SPA turnstile paid for itself in just 4 months*** of operation.

It is interesting to learn that more than 90 % of customers pay cash to enter the restroom. Only 10 % of people opt for payment by card.

* Based on the specific product configuration in the end customer's premises
